

PROJECT PROFILE

Orlando Cogen Annual Outage

Orlando, Florida

Project Value:	\$200,000
Client:	Orlando Cogen
Owner:	Northern Star Generation
Schedule:	May 2009
Project Scope:	Piping repairs and additions during the 2009 annual outage

Project Description:

W. Soule & Company was given a short work window for the annual outage at the Orlando Cogen Facility. The customer had high expectations for completion; missing the deadline was unacceptable. W. Soule & Company completed numerous repairs during the outage including but not limited to: HRSG high pressure blow down piping, ASME code repairs, steam and condensate system repairs, chilled water system additions, piping ties, and ASME R stamp repairs. W. Soule & Company also completed gas burner piping redesign, and installation of new transformer cooling oil piping. W. Soule & Company remained on site during commissioning to monitor start-up.

Project Highlights:

This was the first shut-down that W. Soule & Company performed for Orlando Cogen. The work was completed on schedule and without safety incident. The customer provided W. Soule with a written recommendation highlighting complete satisfaction with the project.
